Eurorando went west – 8-May-2016

Eurorando reached the Azores archipelago for the first time ever on May 8. It was a symbolical moment as, at longitude 27ºW, this Terceira Island walk most likely stands as the westernmost event in the records of ERA.

On a rather windy day 67 walkers venture into the highland pastures of Pico do Boi area, in the centre of the island.

The event was made possible by a partnership between CAAL (The Portuguese Outdoor Club) – the oldest Portuguese member of ERA – and its Azorean member Associação Os Montanheiros.
